

## HEALTH EQUIPMENT SERVICING

### Don't risk the Safety of your Patients & Staff

Mobility equipment is essential to the health care industry and having it in good working order is vital for patient care and to protect the health and safety of health care professionals.

### Preventative Maintenance

RIMS Engineering can provide comprehensive preventative maintenance to ensure mobility equipment is kept in best working order. Servicing is scheduled at regular intervals to best suit the requirements of health care providers.

The burden of regular maintenance is removed from health care providers leaving you free to focus on core activities. All servicing is completed in accordance with all applicable Australian standards and comprehensive reporting is provided. We can service:

- Patient beds - functionality, condition & calibrated weight load testing
- Patient lifters - functionality, condition & calibrated weight load testing
- Lifting sling / Harness validation
- Electric recliner chairs
- Adjustable procedure tables
- Trolleys of all types
- Wheelchairs

### Emergency Repairs

Some equipment is critical and there is no room for loss of functionality. We provide emergency breakdown repairs for vital equipment.

This service is supported through our Hobart and Launceston service centres. To contact your closest service centre phone **1300 725 470**.

### Other Services

We also service and sell:

**Nitrogen generators** - remove the need for gas cylinder handling,

**Breathing Air systems,**

**Air Compressors** of all types and sizes.

Ensure your equipment is up to date & fit to work,
