

HYDRAULIC EQUIPMENT

RIMS Engineering has been supplying and servicing hydraulic equipment since 1981.

Fluid Power Products

RIMS Engineering supply a vast array of fluid power products in partnership with Eaton hydraulics - if you have a hydraulic need, we have a product to suit.

All the products we sell are backed by technical advice from our in house team and the confidence that comes with using quality world leading brands.

We supply:

- Power Packs
- Pumps
- Motors
- Valves
- Cylinders
- Filtration
- Hose and fittings
- Complete Hydraulic systems

Eaton Hydraulics

Eaton's range of pumps, motors, valves, cylinders, manifolds, filters, hose & fittings are found throughout the world on applications from farm equipment to power stations. The Eaton range includes:

- Aeroquip (hose & fittings),
- Char-Lynn (HTLS gerotor motors & steering valves),
- Vickers (vane & piston pumps and motors, solenoid valves, proportional valves),
- Along with the Airflex, Arrow, Duffield, Dynapower, Inter-Normen, Integrated Hydraulics and Weatherhead brands.

Char-Lynn®

We Service what we Sell

Our service doesn't end with the delivery of your product or system.

We are the Tasmanian service agent for Eaton hydraulics and our technicians can service your hydraulic products to keep your plant moving and in optimum condition.
