

NITROGEN GAS GENERATORS

Save Money, Make your Own

Nitrogen generators offer a safe, reliable and cost effective alternative to high pressure gas cylinders.

RIMS Engineering are Tasmania's nitrogen generator specialists. We can provide nitrogen generators for all industries and applications, including:

- **Food production, processing, storage and packaging**
(Snacks, Dairy, Grated cheese, Milk powder, Edible oils)
- **Beverage and bottling**
(Wine, Beer, Spirits, Juice, Milk)
- **Pharmaceuticals**
(Primary & Secondary manufacturing, Laboratory, Inert storage and Packaging)
- **Materials Processing**
(Laser cutting, Heat treatment and Composite manufacturing)
- **Electronics**

Pure, Reliable, Sustainable & Safe

There are some great advantages to producing your own Nitrogen:

- Guaranteed ultra high-purity gas.
- Organic, moisture and oxygen contaminant free.
- Better preservation of product flavour, aroma, texture and nutritional value.
- Environmentally sustainable process, using a supply of compressed air.
- Reduced downtime with an on-demand gas supply 24/7 at the push of a button.
- Improved workplace safety - eliminates the need to handle high pressure gas cylinders.
- Improved efficiency through reduced spoilage
- Extended food shelf life.

RIMS Engineering is a distributor for the Parker filtration range of MAXIGAS, MIDIGAS, NITRO FLOW and NITRO SOURCE nitrogen gas generators. All our products are fully supported by RIMS Engineering and Parker technicians.
